SAGA pattern

SAGA pattern

Aggregat	Actions	Événement déclenché	Actions de compensation
Transaction	createTransaction()	TransactionCreatedEvent	
Transaction	checkValidity()	TransactionCheckedEvent	rejectTransaction()
Transaction	verifyAmount()	CodeNeededEvent	
Transaction	confirmCode()	CodeConfirmedEvent	
BankAccount	makeTransfer()	TransferDoneEvent	
Transaction	storeTransaction()	TransactionStoredEvent	reverseTransfer()
Transaction	approveTransaction()	TransactionApprovedEvent	

SAGA pattern

	SAGA chorégraphié	SAGA orchestré
Avantages	<ul style="list-style-type: none">Communication événementielleSéparation des responsabilités	<ul style="list-style-type: none">Simplifie maintenance et compréhensionUn service chargé du cycle de vie
Inconvénients	<ul style="list-style-type: none">Complexité du suivi des échangesDépendances cycliques	<ul style="list-style-type: none">Peu de communications interservices“God class tendency”
